SUMMARY

Full Stack Developer with strong experience in building scalable web applications using modern JavaScript frameworks and backend technologies. Skilled in designing clean architectures, optimizing APIs, and delivering high-performance user experiences. Experienced in working with monorepos, CI/CD pipelines, and cloud-based deployments, with a focus on writing maintainable and efficient code. Passionate about building meaningful products, improving developer workflows, and continuously learning new technologies, especially in the evolving space of AI-driven applications.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript
- **Frontend:** React.js, Next.js, React Native (mobile apps), Tailwind CSS / NativeWind, HTML5, CSS3
- **Backend:** Node.js, Express.js, REST API design, API optimization & data structuring
- **Database ORM:** PostgreSQL, MongoDB
- **DevOps & Deployment:** Docker, CI/CD pipelines (GitHub Actions), Environment & build management, Cloud deployment (Vercel/AWS)

EXPERIENCE

Full-stack Developer

Sep 2025 – Present

Maeku Technologies Pvt. Ltd.

- Architected and introduced the Monorepo foundation across companion, mobile, and carehub apps to unify codebase management.
- Built Express RESTful APIs and integrated Payload CMS with secure authentication, learning advanced patterns on the go.
- Managed real-world production recoveries and engineered `ErrorBoundary` systems to resolve critical runtime failures and incorrect code pushes. Optimized AWS EC2 instances for cost-efficiency and implemented Docker + Nginx for robust CI/CD flows.
- Delivered core features in a fast-paced environment, refactoring legacy modules to improve overall performance and code maintainability.
- Maintained clean Git history via advanced cherry-picking and authored technical docs for CI/CD pipelines and deployment scripts.

Full-stack Developer

Apr 2026 – May 2026

Only2U

- Built and maintained internal ERP, CMS, and analytics platforms for business operations.
- Developed cross-platform mobile application features while fixing production bugs and improving user experience.
- Built admin dashboards for managing products, vendors, users, orders, and platform content.
- Implemented secure authentication and role-based access control for administrators and vendors.
- Integrated Shopify and inventory management systems with custom backend services for seamless data synchronization.
- Designed analytics dashboards using Next.js, Supabase, and PostgreSQL to visualize business metrics.
- Refactored reusable components and standardized project architecture to improve maintainability and scalability.
- Collaborated across frontend and backend to deliver production-ready features in a fast-paced startup environment.

PROJECTS

SnapStyle AI Image Generator

Built an AI-powered Image style discovery platform using a full-stack JavaScript architecture, featuring scalable APIs, monorepo structure, and cross-platform mobile support with optimized performance and clean UI.

- Built a full-stack fashion discovery platform using React / Next.js and Node.js, focusing on performance and clean architecture
- Integrated AI-based image and text generation to provide personalized style recommendations

- Designed scalable REST APIs with optimized data flow to reduce unnecessary payload and improve response times
- Focused on UX by building responsive, fast-loading interfaces with clean design patterns
